## **TECHNICAL PROFICIENCIES**

React | JavaScript | MERN Stack | ES6 Express | Node | MongoDB | MySQL | CSS | HTML 5 | REST | GitHub | UX/UI | MVC | Relational Databases | Strong Communication | Problem-Solving | GraphQL | Responsive Web Design | Developer Tools | Insomnia | Creating Server-Side API | Third-Party API | Fetch | AJAX | Wireframe Creation | Git | GitHub | TDD | Jest | and more...

## **SUMMARY**

Full-Stack Web Developer with up-to-date skills. Extremely intuitive problem-solver and fast learner. Passionate about coding, debugging, and making things work! Hard-working, punctual, and reliable. Recent graduate of the UC Berkeley Extension Web Development Coding Bootcamp (received an A+ grade).

## **PROJECTS**

**Project:** Pokedex Tracker

**GitHub:** <https://github.com/mseaman26/Pokemon-Trading-Center>

**Live link:** <https://pokemon-app.herokuapp.com>

**Technologies/features:** React | Conditional Rendering | User Authentication | Node | Express | GraphQL | JavaScript | CSS | Bcrypt | MongoDB | GitHub | Heroku | Bootstrap | Cheerio | JWTToken | Bcrypt

**Description:** This is a React.js app made with three others. It provides the user a place to keep track of every Pokemon they've ever caught in any of the Pokemon games!

**Project:** Mike's Wordle

**GitHub:** <https://github.com/mseaman26/Mike-s-Wordle>

**Live link:** <https://mseaman26.github.io/Mike-s-Wordle/>

**Technologies/Features:** Bug-Free Wordle Game Logic | Local Storage | JavaScript | CSS | Bootstrap | HTML 5 | GitHub | jQuery |

**Description:** This app is a remake of the NYT Wordle game. I made it because I wanted to provide my friends and family a second daily Wordle game where I get to choose the daily word. Feel free to solve the daily word!

**Project:** [Fetch](#)

**GitHub:** <https://github.com/mseaman26/Fetch>

**Live link:** <https://fetchdograter.herokuapp.com>

**Technologies:** JavaScript | CSS | Seeded Database | User Authentication | Bcrypt | Web APIs | Sequelize | GitHub | Handlebars | Node | Sessions | Express | Heroku | Bootstrap

**Description:** This app allows the user to rate the cuteness of random dogs by comparing two dog images at a time. The user picks either the left dog or the right dog and their decision runs an Elo rating algorithm to ultimately determine which dog is at the top of the leaderboard.

## **EDUCATION**

### **Certificate, Full Stack Web Development**

UC Berkeley Extension, Remote (2022)

### **Bachelor of Arts: Music, Minor: Electronic Music**

UC Santa Cruz, 2000-2004

### **Workshop in Algorithmic computer Music (WACM)**

UC Santa Cruz, Summer 2003

### **Workshop in Audio Spectral Analysis**

Stanford University: CCRMA Department, Summer 2003

## **WORK EXPERIENCE**

### **Whole Foods Market**

Produce Supervisor

August 2005-present

San Francisco, CA

- Supervising the Produce Team for multiple store locations
- Motivating the team and keeping team members positive
- Delegating and directing a team in a sometimes chaotic, high-paced, high-pressure environment
- Following instructions from leadership
- Maintaining good standing by being punctual, hard-working, reliable, amicable, good with customers, and fun
- Won Team Member of the Month twice
